| Concrete understanding            | <input type="checkbox"/> 1. Are key points that should be known, remembered, and learned about the coursework correct?<br><input type="checkbox"/> 2. Is the gist of the inferences drawn from the results accurate?<br><input type="checkbox"/> 3. Are the necessary and relevant concepts and principles for understanding the coursework and for supporting the correct results accurate and structured with logical reasoning?<br><input type="checkbox"/> 4. Does the coursework show that it is (or are the answers) on target with sound rationale, backed by strong comprehension, and defended well?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | More than half of the exemplary checklist has been met | Half of the exemplary checklist has been met    | Less than half of exemplary checklist has been met | _____                     |
| Articulateness in communications  | <input type="checkbox"/> 1. Does the coursework show that it has not committed plagiarism?<br><input type="checkbox"/> 2. Is the presentation of information logically structured, mutually exclusive, and/or collectively exhaustive (should it be necessary)?<br><input type="checkbox"/> 3. Are data, figures, tables, equations, abbreviations, and notations properly labelled and neatly presented?<br><input type="checkbox"/> 4. Is the report (written and/or oral) made according to suitable and/or technical standards and set format?<br><input type="checkbox"/> 5. Are literature or source references properly cited?<br><input type="checkbox"/> 6. Is there absence of verbosity?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | More than half of the exemplary checklist has been met | Half of the exemplary checklist has been met    | Less than half of exemplary checklist has been met | _____                     |
| Competence in applying principles | <input type="checkbox"/> 1. Are methods for achieving the coursework objectives properly selected?<br><input type="checkbox"/> 2. Is the implementation of the methods successful?<br><input type="checkbox"/> 3. Is the evaluation for testing the correctness of the results appropriate?<br><input type="checkbox"/> 4. Are the required output and deliverables met according to the set requirements?<br><input type="checkbox"/> 1. Do the results show evidences of all the project objectives being attained?<br><input type="checkbox"/> 2. Does the documentation discuss how the topic developed historically from the past until now?<br><input type="checkbox"/> 3. Does the documentation discuss how the topic developed technically from the past until now?<br><input type="checkbox"/> 4. Did the proponent(s) define their project entirety into a manageable structure?<br><input type="checkbox"/> 5. Did the proponent(s) sequence their project activities correctly?<br><input type="checkbox"/> 6. Did the proponent(s) estimated the project duration properly?<br><input type="checkbox"/> 7. Did the proponent(s) develop their schedule well?<br><input type="checkbox"/> 8. Did the proponent(s) perform schedule control?<br><input type="checkbox"/> 5. Are encountered problems, like source of errors, clearly identified and addressed by sharp and logical investigative and observational skills?<br><input type="checkbox"/> 6. Does the submitted coursework match academic honesty standards? | More than half of the exemplary checklist has been met | Half of the exemplary checklist has been met    | Less than half of exemplary checklist has been met | _____                     |
| Remarks:                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                        |                                                 | Grade:                                             | = _____ / 12<br>= _____ % |
